1. After entering data into a cell, which option(s) will move your cursor into the next cell underneath your active cell? 1 / 1 point

(One or more answers are possible. Partial credit will be awarded.)

- [ ] Press **Tab**.
- [x] Click the mouse pointer into the cell underneath.

> **Nice work**
>
> Yes, that's correct - you can use the mouse. However, this can be a bit slow and requires you to take your hand of the keyboard and disrupt your workflow. What else could you do instead?

- [x] Press **Enter**.

> **Nice work**
>
> Yes! Excellent. Getting into the habit of pressing **Enter** to move into the next cell underneath is great practice!

2. Which tool should we use to help keep headings visible when we scroll through a large workbook? 1 / 1 point

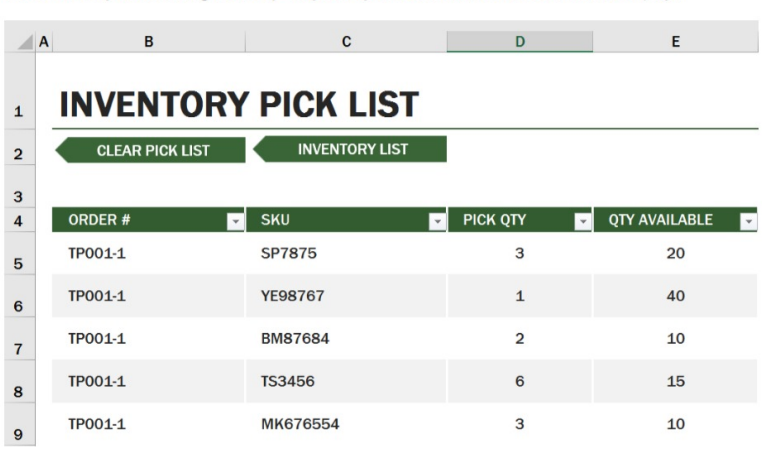

- ( ) Page Break Preview
- (•) Freeze Panes
- ( ) Headings
- ( ) Split

> **Nice work**
>
> Yes, well done. You are ready for the next challenge. Don't wait, get into it.

3. You are going to use the **Freeze Pane** function. 2 / 2 points

Take a look at the screenshot below. Which cell do you need to click in order to freeze columns **A** and **B** as well as rows **1-4**? If you are finding this tricky - why don't you download the workbook and have a play?
